SUMMARY

With hands-on experience in C#, Java, Python, SQL, and web development technologies, I've developed and tested real-world applications such as a employee payroll management system and student registration platforms. I've also gained experience in version control using GitHub and development tools like Visual Studio, NetBeans, and Apache Tomcat. My academic journey has exposed me to a wide range of technologies, including JavaScript, Node.js, Express, PostgreSQL, and modern front-end frameworks such as React.

EXPERIENCE SUMMARY

Education Assistant | Dowerglen High School

NOV 2021 - SEPT 2022

- I provided support to teachers in managing classroom activities and ensuring a productive learning environment.
- My responsibilities included:
 - Assisting in lesson preparation, organizing materials, and setting up classrooms.
 - Providing one-on-one support to students who need extra academic assistance.
 - Maintaining and updating student records, attendance registers, and progress reports.
 - Facilitating group activities and managing student engagement during lessons.
 - Supervising students during school hours, ensuring discipline and safety.
 - Supporting extracurricular programs, including coaching and event coordination.
- Through this role, I have developed strong communication, organizational, and leadership skills, which have enhanced my ability to work in dynamic environments and collaborate effectively.
