SUMMARY

Aspiring software developer with academic practical experience building full-stack applications using C#, Java, Python, and React. Created and deployed projects such as a payroll management system and a student registration platform, demonstrating skills in backend development, database design, and version control with Git. Comfortable working with tools like Visual Studio, NetBeans, and PostgreSQL. Known for being a quick learner, detail-oriented, and a strong collaborator, ready to contribute to dynamic development teams and real-world projects.

EXPERIENCE SUMMARY

Education Assistant | Dowerglen High School   NOV 2021 - SEPT 2022

- Maintained accurate student attendance and academic records using electronic school management systems and Excel spreadsheets.
- Supervised students during instructional time, breaks, and extracurricular activities, ensuring safety, discipline, and engagement.
- Assisted in planning and coordinating school events, leveraging communication tools for scheduling, outreach, and logistics.
- Provided administrative support to teachers and staff, including organising files, preparing reports, and maintaining classroom resources.
- Developed strong communication, time management, and technical support skills in a dynamic and fast-paced academic setting.
- Organised classroom environments and managed learning materials to support daily operations.
